

Object-Oriented Design Document for a Personal Address and Phone Book

Part 1: Architectural Design

Prepared for C-S 341 – Software Engineering

Group #3

Kasi Periyasamy

David Riley

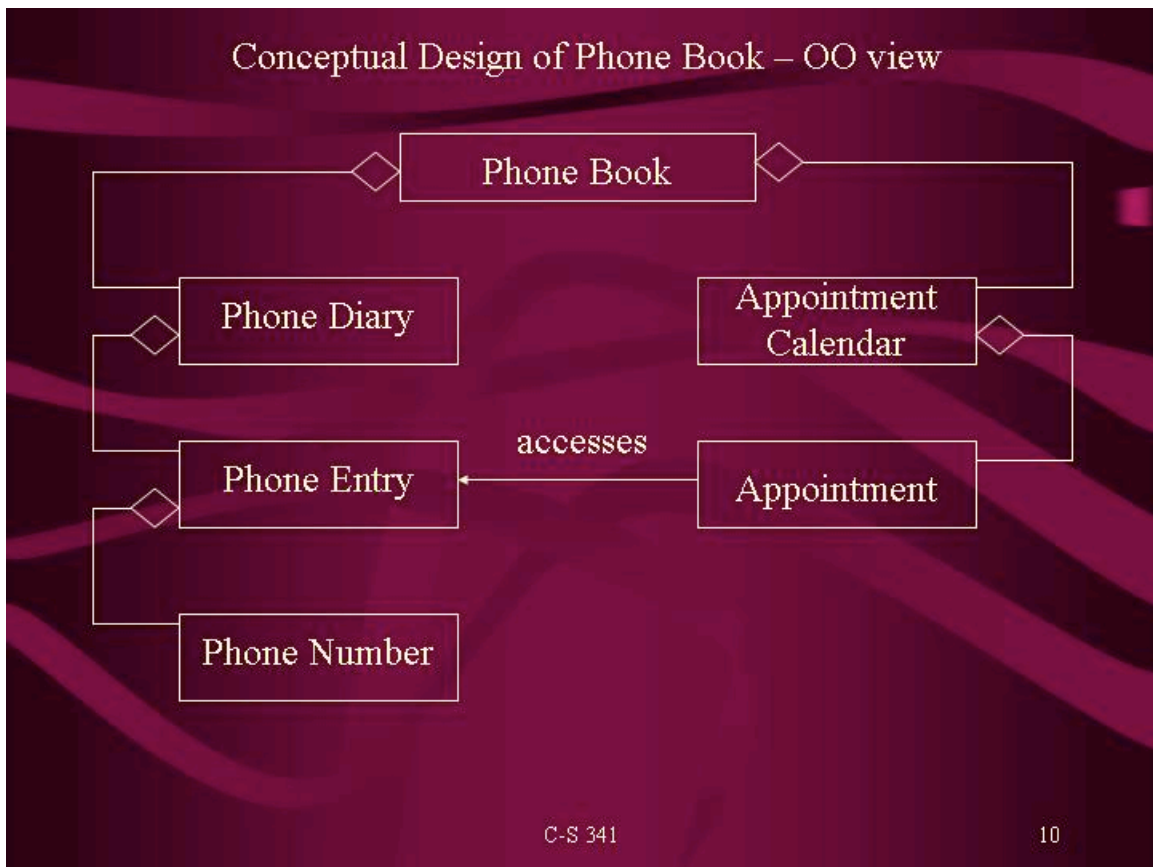

Tom Gendreau

November 03, 2003

1. About this document

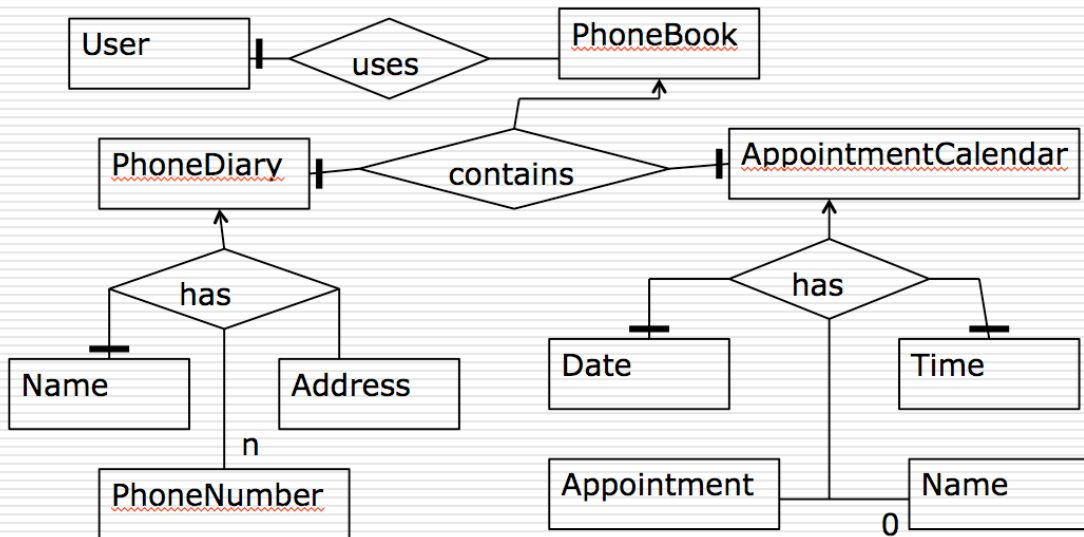

This document describes the architectural design of the software for a personal address and phone book. The requirements for this software are given in [1,2,3]. The architectural design includes a conceptual object-oriented view (described in UML notation) and a data view (described in ERD notation).

2. Conceptual View

3. Data View

ERD –Phone Book
