General Information

Canvas course site (programming quiz and project submissions, post grades)

Textbook: Data Structures and Algorithm Analysis in Java 3rd Edition by Mark Allen Weiss

Grading: 100 points: 10 in class quizzes (best 10 of 12)
50 points: Programming quizzes (best 5 of 6)
150 points: Programming projects
100 points: **Cumulative** final exam

400 total points
General Information

Attendance: *Class attendance is required.* Lectures will be the only source for some class material. If you miss class, it is your responsibility to get notes from a classmate.
A quiz will be given in class every Friday except January 28 and May 6. Because of COVID I will have one date when I will give a quiz that can substitute for a quiz missed because of illness (or an other legitimate excuse). The substitute quiz will be given at 4:30 on Friday April 29. Unusual situations such as multi-week illness will be handled on an individual basis.
General Information

Programming quizzes and projects will be submitted through Canvas.

Grading: The exact grade ranges will not be determined until after the final exam. Estimated grades will be shown after quizzes 4, 7, and 12. Border line point values will be assigned letter grades using the instructor's subjective evaluation of a student's work.
