2:00-3:00 Thursday
Saturday office hours will start in the second half of the semester
General Information

Canvas course site (programming quiz and project submissions, post grades)

Textbook:  *Data Structures and Algorithm Analysis in Java 3rd Edition* by Mark Allen Weiss

Grading:  100 points: 10 programming quizzes (best 10 out of 11)
100 points: 10 in class quizzes (best 10 of 12)
100 points: Programming projects
100 points: **Cumulative** final exam
400 total points
General Information

Attendance: *Class attendance is required.* Lectures will be the only source for some class material. If you miss class, it is your responsibility to get notes from a classmate.
General Information

A quiz will be given in class every Friday except September 10. Because of COVID I will have 2 dates when I will give a quiz that can substitute for a quiz missed because of illness (or other legitimate excuse). The dates of the substitute quizzes will be determined later but the time/day of the quizzes will mostly be 4:30/Friday. Unusual situations such as multi-week illness will be handled on an individual basis.
General Information

Programming quizzes and projects will be submitted through Canvas. Keep copies of each quiz or project until it is graded.

Grading: The exact grade ranges will not be determined until after the final exam. Estimated grades will be shown after quizzes 4, 7, and 11. Border line point values will be assigned letter grades using the instructor's subjective evaluation of a student's work.
